-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-19 are pending.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 and 8-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blumberg et al (US 5,232,684).

Blumberg et al teaches a process of labeling resiniferatoxin with iodine which is analogous to the claimed process; note the Example 1 in columns 11-12 and Example 4 in column 14 of the patent. The prior art Example 4 suggests an iodinating process to the side-chain phenyl ring which would read on the current iodinating step to form the current compound of Formula (II). The prior art process would produce a labeled resiniferatoxin wherein an iodine atom would be attached to either meta-position and/or ortho-position on the side-chain phenyl ring of the compound; note compounds of claim 17 and claim 18 of the patent, and the prior art compounds are deemed as position isomers of the claimed compounds. Thus, the claimed invention would be deemed obvious over the teachings of Blumberg et al.

Claims 5-7 are allowable since the prior art does not teach or fairly suggest the current iodinating (or labeling) step of the claimed process.
